Pass Math FCAT

## Coral Glades High School Areas of Interest and Conservatories

### Class of 2011 & 2012

\*Selecting a High School Major area of interest is not the same as selecting a college major or making a life-long commitment to a specific occupation; selection of a high school area of interest is an opportunity for students to choose electives that truly interest them, providing a meaningful connection to coursework and time spent in school.

#### **Arts and Communications Conservatory**

Arts and Communications students use their creativity in a variety of career fields. These students are the next generation of artists, writers, creators and performers. Students can look forward to quality classroom instruction and rigorous studio practice in art, journalism, music, debate, telecommunications, theatre, and writing.

**Engineering, Technology & Information Management Conservatory**

This Conservatory will feature an overview of the engineering profession & business-related careers. As part of this multi-faceted conservatory, students may be challenged to apply fundamental math, writing, drawing, and computer skills to the processes of mechanical design or will be gaining exposure to 21st century career opportunities in the financial services industry, digital technology industry, sales/marketing industry, and entrepreneurship. As part of the conservatory, students can design and build several projects by following the steps of the design cycle and by applying fundamental concepts from the courses in the conservatory or may choose to participate in one of the many business programs offered.

<p><b>Public/Human Services &amp; International Studies Conservatory</b></p> <p>Public/Human Services and International Studies encompass one of the broadest occupational fields of study. Students in this conservatory have a variety of interests ranging from working with others, volunteering, and law. In addition to required courses, students in this conservatory will take courses that focus on serving the community. Students in this conservatory may also be interested in gaining knowledge and critical skills necessary to be successful in positions impacting international policy and development programs. Students may seek opportunities in international business positions, for non-governmental organizations, such as the World Bank, Red Cross and other humanitarian organizations; and within government agencies, as planning and program officers, regional desk officers, and more.</p>
